For the phase space above, Circle one:  
x dominates, y dominates,  
 competitive coexistence, competitive exclusion.

If  $x(0) = 600, y(0) = 20$  then  
 $x(100) \approx \underline{1050}, y(100) \approx \underline{0}$

If  $x(0) = 600, y(0) = 0$  then  
 $x(100) \approx \underline{1050}, y(100) \approx \underline{0}$

For the phase space above, Circle one:  
 x dominates, y dominates,  
 competitive coexistence, competitive exclusion.

If  $x(0) = 600, y(0) = 20$  then  
 $x(100) \approx \underline{0}, y(100) \approx \underline{570}$

If  $x(0) = 600, y(0) = 0$  then  
 $x(100) \approx \underline{650}, y(100) \approx \underline{0}$

For the phase space above, Circle one:  
 x dominates, y dominates,  
competitive coexistence, competitive exclusion.

If  $x(0) = 600, y(0) = 20$  then  
 $x(100) \approx \underline{175}, y(100) \approx \underline{417}$

If  $x(0) = 0, y(0) = 600$  then  
 $x(100) \approx \underline{0}, y(100) \approx \underline{500}$

For the phase space above, Circle one:  
 x dominates, y dominates,
